OVERVIEW

The HDR-16x16 Plus V3 conforms to the HDMI 1.4 standard and provides a connection to view any sixteen HDMI video sources on any combination of sixteen video displays. The matrix configuration provides maximum flexibility, allowing switching between any high-definition source and/or display. The HDR-16x16 Plus V3 provides HDMI output up to 40 feet with HDTV resolutions of 480p, 720p, 1080i, 1080p and 3840x2160 (4k) @30Hz. The system works with Blu-ray players, TiVo systems, HT PCs and satellite set-top boxes that connect to an HDMI display. Users can switch to any source locally or remotely via an RS-232, USB or TCP/IP connection. Our HDMI router is controlled by Windows®-based software that is easy to understand and simple to use – a cornerstone of all Smart-AVI products.

FLEXIBLE CONTROL

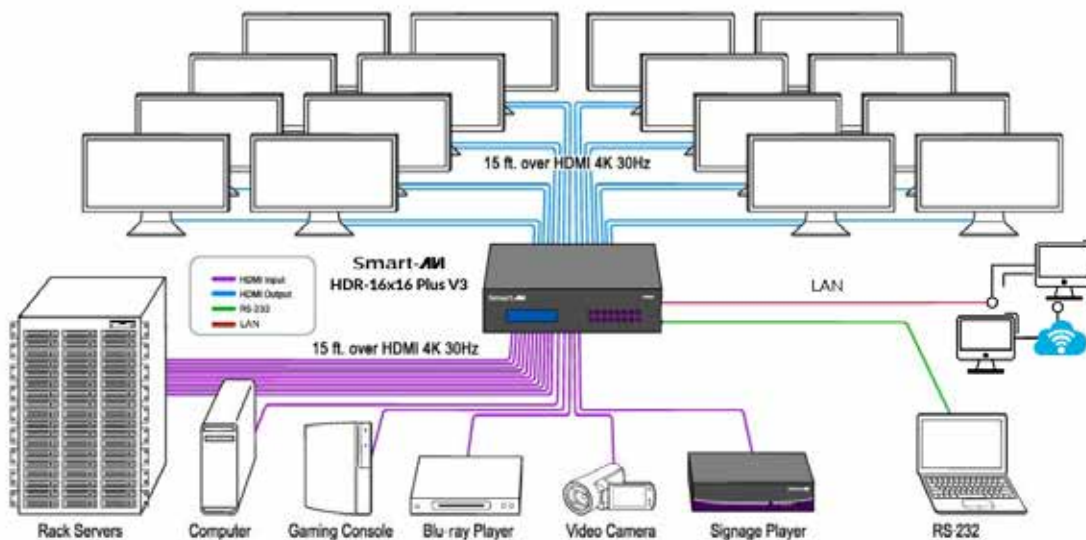

The SmartAVI HDR-16x16 Plus V3 can be controlled from the front panel via keypad and LCD, allowing users to see which inputs are connected to which outputs.

RS-232: Controlling the HDR-16x16 Plus V3 has never been simpler with SmartAVI's Windows®-based SmartControl software. With SmartControl, users can assign a unique name to each port on the matrix, as well as each display, customizing projects to meet users' needs. Although all the functions of the matrix are available locally on the front panel of the HDR-16x16 Plus V3, using SmartControl allows for customization of all the matrix's functions.

TCP/IP: Remote control is essential to real-time management of the HDR-16x16 Plus V3. SmartAVI's SMTCP module is the perfect solution to effective remote management.

SOFTWARE SETUP

The HDR-16x16 Plus V3 hardware comes with the easy-to-use, Windows®-based SmartControl software application that makes user interface simple. Using SmartControl, you can assign a unique name to each port on the HDR 16x16, customizing projects to your liking and needs.

LAN (TCP-IP) CONTROL

To enable TCP-IP control, connect an ethernet cable to the HDR-16x16 Plus V3 ethernet port. Refer to page 5 for port information. By default, the HDR-16x16 Plus V3 will connect to the network using DHCP. Download Matrix Mate-Network Assistant software and execute to locate your IP address. Click the Search button. After a few seconds your IP address should appear.

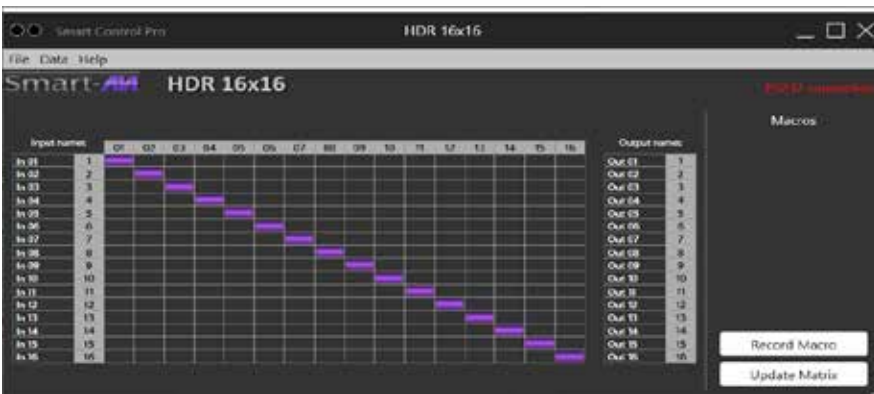

Enter the IP address in a browser of your choice and the Web Control login screen should appear as shown in figure 5-1.

Figure 5-1: SmartAVI HDR-16x16 Plus V3 Login Webpage

The default Username and Password is admin. After logging in successfully, you will be brought to the control screen shown in Figure 5-2.
